Simple, but efficient : With this enclosure you take full advantage of the small form factor of the Intel D945GSEJT Half-Height Johnstown mainboard. And with its dimensions of only 199x180x39mm it has, with an internal volume of less than 1.4 liters, room for one 2.5" harddrive or SSD drive. The enclosure can be operated fully fanless with the Intel D945GSEJT even under full load in continous operation. But an enclosure fan is included in scope of supply which can get connected to the mainboard in case the enclosure is installed in an area with limited air flow.

Optionally available accessoiry :

- Stand
- VESA screws for installation on TFT/LCD/Plasma/... with VESA-100 drilling.

On the enclosure rear side there is a small, still closed, hole where you can eg. install [a WLAN antenna](#).

Technical data :

Drives : 1x 2.5"

Front-connectors : 2x USB 2.0, 1x earphone, 1x microphone

Front-buttons : Power, Reset

Front-LED : Power, HDD

Dimensions : 199 x 180 x 39 mm
