- M12 cable
- Power and signal harness
- Video input and trigger
- Tx/Rx connections

The CAB-LAN-01 is an M12 cable for the BKT865-LAN-01 docking solution. It is intended for VCC, IGN, GND, video input, video trigger and Tx/Rx connections.

This cable is used where the docking system must connect power and signal lines in a single structured harness.

Compatible with: Topicon MDT880, Topicon MDT865, Topicon MDT1065
