- LoRa communication module
- Long-range wireless communication
- 850.125-930.125 MHz
- Telemetry and sensor connectivity

The MOD-LORA-02 is a LoRa communication module for the MDT880. It supports long-range wireless communication in the 850.125 to 930.125 MHz range.

This module is ideal for telemetry, sensor connectivity and other applications where robust long-distance communication is required.

Compatible with: Topicon MDT880, Topicon MDT865, Topicon MDT1065
